Profile

Passionate programmer with over 10 years of experience using a diverse range of tools to create interactive flash apps, web applications, API's and native IOS applications.

Experience

Full-Stack Developer - Caboodle Events Post Falls, ID 2017

Hired as full-time contractor to fix a platform originally built in PHP by offshore developers. Was the sole developer/designer responsible for rebuilding entire platform in 6 months using latest Rails5, AWS Elasticbeanstalk, & TDD with RSpec.

<http://caboodle.events>

Mobile Applications Developer, Above Labs LLC San Francisco, California 2010-2015

Worked individually and on a teams as a lead developer for projects using Rails, Swift, Javascript/Coffeescript, Objective-C, & Actionscript 3.

Flash Developer, Screamstream Interactive San Francisco, California 2007-2010

Performed hybrid design & development roles in predominantly Actionscript 3 based websites, games, & interactive ads.

Freelance Developer San Francisco, California 2009-2012

Consultant work ranging from Actionscript 3 based sites, widgets and Air applications. Developed custom content management systems written in PHP, & designed UI's for portfolio sites.
